

Balancing in HighTech Precision

Easy and precise balancing of surface grinding machines without disassembly of grinding wheels!

Is automatic or manual balancing required?
With or without AE function?

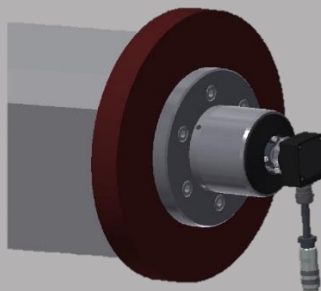

Manual, mobile balancing: success in nearly no time!

BMT150M
incl. sensors.
Usable at each
machine

μ-precise contact
one spark is enough
with AE acoustic
emission sensors
For contact control,
wheel dressing and
crash-avoidance

Automatic balancing at the touch of a button

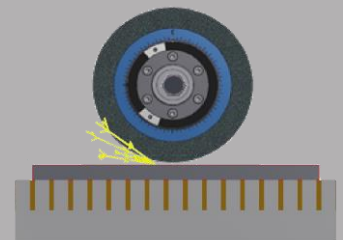

ESB with
transmitter

AB50

AB300

For manual and
automatic balancing
systems

Extra flat balancer!

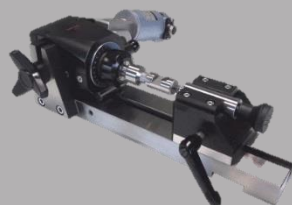

Equipment package #1: 3.ESB040F.096.C / 3.AB50 / 3.S.42G.03 / 3.PU.M5.4.3.V2.1

Equipment package #2: 3.ESB040F.096.CA / 3.AB300 / 3.S.42G.03 / 3.PU.M5.4.3.V2.1

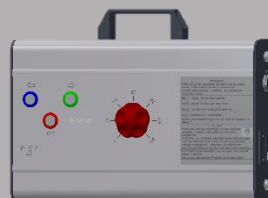

Circular grinding. 100% additional profit with the original RAPID

4.RS01.F
Grinding at
cantilever support

4.RS02.R
Grinding between
centres

4.SG01
Control unit

For single production and
small series

Proven and immediately
ready for use

- Functional
- Precise
- Cost effective
